CATNIP

Library guide

What is CATNIP?

The Cataloguing Network in Pietermaritzburg (CATNIP) is a library group in the Pietermaritzburg area which is building up a joint catalogue on the computer of the University of KwaZulu-Natal in Pietermaritzburg.

How does this help library users?

It means that they can look at the catalogues of all CATNIP libraries at the same time. It also means that the library materials of the Pietermaritzburg area are increasingly being regarded as a shared resource.

When I find a book in the catalogue, how do I know which library it is in?

Location marks of items in CATNIP libraries (other than loan books in the Cecil Renaud (Main) Library) are preceded by a location abbreviation such as CED (Cedara Agricultural Development Institute) or TAG (Tatham Art Gallery). Location abbreviations for member libraries are listed under **Member libraries** (overleaf). In addition, in the catalogue record the name of the library is spelt out one or more lines below the location abbreviation.

Can I borrow from other CATNIP libraries?

In many cases you can do so through the Inter-Library Loan service or the Theological Cluster Inter-Library Loan system. In some cases material is not available for loan and must be consulted in the library concerned. **Member libraries** (overleaf) give details of loan arrangements for each library.

Are there any other advantages?

Yes. Libraries can begin to complement each other's material so that budgets stretch further. Pietermaritzburg library resources are also more tightly integrated into the national library network.

MEMBER LIBRARIES (EXCLUDING THE UNIVERSITY LIBRARY)

Abbreviations in bold type at the beginning of each entry represent the prefixes used on the location line in catalogue entries. All telephone and fax numbers are preceded by the code 033.

AFFA *Afrikaans Department Fine Art*
Old Main Building, University of KwaZulu-Natal, King Edward Avenue,
Scottsville
