Available databases

Select all available databases

Compendex

Comprised of journals, conference proceedings, dissertations, standards, books, and recently preprints, Compendex content is sourced from thousands of publishers from around the world, including major engineering societies such as IEEE, ASME, SAE and ACM.

Inspec

The Inspec database, created by The Institution of Engineering and Technology (IET), contains over 22 million records from across global publishers to deliver quality content to a wide range of research communities.

Engineering Village is widely used by academic institutions, research organizations, and industry professionals to support engineering research and development, making it a key tool in the engineering community. Engineering Village aggregates content from multiple databases, including Compendex and Inspec which covers a broad range of engineering disciplines, as well as related fields such as computer science and materials science.

Upcoming upskill sessions:

The attendance to these webinars is free of charge, but they require registration.

Date	Session
14 May 2025	Supporting Systematic Literature Reviews with Engineering Village (intermediate)
3 July 2025	Enhancing your Research Efficiency with Engineering Village (intermediate/advanced)
14 July 2025	Engineering Village - Core Features and Recent Enhancements (refresher)
