(Students and users need to register their own account for CNKI AI)

- China Academic Journals Full-text Database: There are more than 8570 kinds of Chinese academic journals, which includes more than 1970 kinds of core journals of Peking University and more than 3800 first published online journals dating back to 1915 and totaling more than 63million full-text articles. Academic journals in foreign languages include more than 75,000 kinds of journals from more than 900 publishing houses in nearly 80 countries and regions, covering 96% of JCR journals and 90% of Scopus journals and dating back to the 19th century and containing more than 92million titles in foreign languages, which can link to full text.

- China Doctoral Dissertations/ Masters' Theses Full-text Database: This database has published 377doctoral degree-granting units' over 619,000 doctoral dissertations, and 521 master degree-granting units' 6 million master's theses, which dates back to 1984 and covers basic science, engineering technology, agriculture, medicine, philosophy, humanities, social sciences and other fields.

- China/International Proceedings of Conference Full-text Database : This database collects the important conferences held by the China Association for Science and Technology and the national level two or above by the societies, associations,

universities, research institutes and government agencies, as well as the literature published at international conferences held in China since 1999. Some of the key conference literature are back to 1953. There are more than 44,600 domestic conferences and international conferences with a total literature of more than 3 million.

- **China Core Newspapers Full-text Database** : It is a continuously and dynamically updated newspaper full-text database with academic and informative newspaper literature. The newspaper database has collected and continuously updated more than 500 kinds of important party newspapers, industry newspapers and comprehensive newspapers at all levels published since 2000.

- **China Reference Full-text Database**: The content of the China Yearbooks Full-text Database covers various fields such as basic national conditions, geography and history, politics, law, economy, science and technology, education, culture and sports, medical and health care, social life, statistical data, documents, standards, and laws and regulations. Currently, the total number of yearbooks is 5260types, 49000volumes , 52 millionarticles.

- **China Reference Full-text Database** : is a large online search platform for Chinese reference books with accuracy, authority and credibility. It has a long-term cooperation with more than 300 publishing houses such as Shanghai Lexicographical Publishing House, The Commercial Press, Zhonghua Book Company, etc. It has collected more than 12,000 reference books, about 20 million entries and more than 3 million pictures.

- **China Economic and Social Statistics Database**: An authoritative macro-statistical database and intelligent analysis system. Far from being merely a collection of yearbooks, it is a comprehensive big data service platform that integrates statistical data querying, in-depth mining and analysis, decision support research, and personal data management. Enhanced with CNKI's knowledge-augmented large models, the platform provides a one-stop solution for users, covering the entire process from "data retrieval" to "report generation."
